Magisterial House

MESSAGE OF THE GRAND MASTER AND HEAD OF STATE OF KMFAP
TO ALL PARTICIPANTS TO THE IBSSA ANNUAL MEETING 2015

The Body Guards and the Security agents are in reality the Knights of the 21st Century, and there has never been a more urgent need of well trained and highly competent Security Professionals as in the present times.

The task of securing the persons, the properties and the goods, all over the World has never been more dangerous, but also more challenging, therefore it has never required highly trained professionals as in the present times.

IBSSA, as the leading international organization at World level dedicated to Body Guards and to Security Services, has, for many years, included in its activities a very serious professional security training program, which is improving its already high standards of Quality every year, and this is a major contribution for the Peace and Security.

Without a high quality Professional Training, an efficient Security can not exist and if Security does not exist the results are those tragic images that we all can see, of millions of people, all over the World, escaping from their own countries in search of Security in other countries.

As the Knights of 21st Century, you, dear participants to this IBSSA Annual Meeting, are the first line of guardians of the Law, the Order and the Security of many millions of persons, so you must feel as honoured to be IBSSA members as I feel for being an IBSSA Patron.

God bless you all

José, Prince
